Leveraging Resources, Linking Researchers

National Animal Nutrition Program

- **Established in 2010; renewed (and expanded) in 2015.**
- **A research-support activity requested by stakeholders.**
- **Focus of the NANP:**
 - **Address challenges facing researchers, educators, and support agencies in animal agriculture and fill voids in the research and academic communities.**

Funding and Governance

- **NANP is one of seven National Research Support Projects.**
- **Administrative Advisors from four regions:**
 - **Bret Hess (Lead), University of Wyoming**
 - **Lesley Oliver, University of Kentucky**
 - **David Benfield, The Ohio State University**
 - **Rick Rhodes, University of Rhode Island**
- **National Program Leaders from USDA/NIFA:**
 - **Charlotte Kirk Baer (Lead)**
 - **Steve Smith**

Structure of the National Animal Nutrition Program

- **Coordinating Committee – M. Lindemann (UK)**
- **Feed Composition Committee – P. Miller (UNL)**
- **Modeling Committee – M. Hanigan (VT)**

Coordinating Committee Members

- **Merlin Lindemann (Chair), University of Kentucky**
- **Gary Cromwell (Past-Chair), University of Kentucky**
- **Todd Applegate, University of Georgia**
- **Don Beitz, Iowa State University**
- **Ryan Dilger (Feed Comp), University of Illinois**
- **Heidi Rossow (Modeling), University of California-Davis**
- **Nancy Irlbeck, Washington State University**
- **Jack Odle, North Carolina State University**
- **Delbert Gatlin, Texas A&M University**
- **Carey Williams, Rutgers**
- **Joel Caton, North Dakota State University**
- **Robin Schoen, National Academies/NRC (Liaison)**

Feed Composition Committee Members

- **Phil Miller (Chair), University of Nebraska**
 - **Andres Schlageter – University of Nebraska**
- **Ryan Dilger, University of Illinois**
- **Bill Dozier, Auburn University**
- **Mark Edwards, Cal Poly – San Luis Obispo**
- **Alexander Hristov, Pennsylvania State University**
- **Brian Small, University of Idaho**
- **Mark Nelson, Washington State University**
- **Michael Lilburn, The Ohio State University**
- **Casey Bradley, DSM**
- **William Weiss, The Ohio State University**

Modeling Committee Members

- **Mark Hanigan (Chair), Virginia Tech**
 - **Veridiana De Souza Daley, Virginia Tech**
- **Heidi Rossow, University of California-Davis**
- **Tim Hackmann, University of Florida**
- **Ermias Kebreab, University of California-Davis**
- **Peter Ferket, North Carolina State University**
- **John McNamara, Washington State University**
- **Luis Tedeschi, Texas A&M University**
- **Nathalie Trottier, Michigan State University**
- **Mike VandeHaar, Michigan State University**
- **Dominique Bureau, University of Guelph**

**How Does the National Animal
Nutrition Program Collaborate with
NASEM
(the National Research Council)?**

Support

- **Scientific and Technical**
 - Development of a system for management of **feed ingredient** information, including a **feed ingredient database**.
 - **Modeling** support for establishment of nutrient requirements for agricultural animals (beef, dairy, swine, and poultry).
 - **Assistance to requirement revision committees** – respond as requested and as able to help meet their needs

Who Are We?

The National Animal Nutrition Program (NANP) serves as a forum to identify high-priority animal nutrition issues and provides an integrated and systemic approach to sharing, collecting, assembling, synthesizing, and disseminating science-based information, educational tools, and enabling technologies on animal nutrition that facilitate high-priority research among agricultural species.

Nutrition Modeling in R is an important component of nutritional research as diet formulation is a quantitative process. To design diets that meet or exceed the nutrient requirements of the species of interest, one must be able to predict the absorbed nutrient supply and the animal needs for those nutrients, or more robustly, animal responses to varying supply of the nutrients. Thus the construction and parameterization of models is prevalent in animal nutrition research. In the Nutrition Models Workshop you will learn modeling approaches required to construct, parameterize, and evaluate a model.

2018 NANP Symposium: Future of Data Analytics in Nutrition: Knowledge Gaps, Data Collection and Quality, and the Role of Supporting Tools for Sustainable Development.
ASAS-CSAS Annual Meeting, Vancouver, Canada.

Corn grain, dry (Grain products)

[Back to Categories](#)

[Back to Feedstuff List](#)

Ingredient:

Corn grain, dry

Display Basis: ☒ Dry Matter ☐ As Fed

[FILTER COMPOSITION](#)

[Clear All Filters](#)

DM Content (%):

100

Year Start

Year Start

Year End

Year End

Definition: Dried seeds of *Zea mays*. Seeds could be ground or rolled (i.e. reduced in particle size by passing grains between rollers)

AAFCO : 48.4, Ground corn

IFN : 4-02-861, Maize, grain ground

EU : 1.2.1, Maize

Alternate Names:

Corn grain dry, ground, Corn grain, rolled, Corn, yellow dent,

Scientific Name: *Zea mays* sp. *mays*

Data Type

☐ Peer Reviewed

☐ Commercial

☐ Academic

Future - Goals and Direction

- **Expanded opportunities with the website.**
- **More dynamic, current, and robust feedstuff data base.**
- **Expanded educational options through the website.**
- **Modeling workshops at societal meetings (ADSA, ASAS, PSA, ESS).**
- **Integrated animal performance databases with nutrient requirement estimates.**
