NATIONAL
ANIMAL
NUTRITION
PROGRAM

Science based. Data driven.
Future focused.

We're passionate stewards of the largest collection of animal nutrition data, resources, and tools, from feed composition analysis to predictive modeling.

Strength in numbers.

4 million records on feed composition from scientific literature and analytical labs

500,000 observations from **549 students** on animal performance and metabolism

600+ people trained in modeling techniques

300+ resources on animal nutrition and modeling statistics

500+ visitors, from **57 countries**, per month

More data means more accuracy. And we're only just beginning.

Our living data repository enables the animal research community—from academics to scientists to industry professionals—to make informed, accurate decisions that result in a thriving, healthier world.
