## **Overview**

The National Animal Nutrition Program (NANP) brand puts your organization's most enduring message at the forefront:

NANP's science based, data driven, and future focused data repository supports research, teaching, outreach, industry, and government use, which helps create a thriving, healthier world for humans, animals, and the environment.

Through properly executed graphic design and copy elements, your brand elevates your set of values and connection to your audience(s) in clear, consistent, and compelling ways.

# NATIONAL ANIMAL NUTRITION PROGRAM

# The NANP logo is a distinctive, memorable symbol that serves as your brand's ultimate recognition.

This section will demonstrate the appropriate ways to display the logo, ensuring brand integrity, clarity, and consistency.

# NATIONAL ANIMAL NUTRITION PROGRAM

#### Full color (preferred)

The full-color version of the logo should be used with priority. Use the full-color version on white backgrounds only.

# NATIONAL ANIMAL NUTRITION PROGRAM

#### One color

Use the **black version** of the logo on a white background only, when grayscale printing is your only option.

Use the **white version** of the logo for one-color reproduction, grayscale printing, or on a background color other than white.

# NATIONAL ANIMAL NUTRITION PROGRAM

## NATIONAL ANIMAL NUTRITION PROGRAM

one-color vertical logo on white

full-color vertical logo on white

one-color vertical logo on NANP Dark Green

NATIONAL ANIMAL NUTRITION PROGRAM

one-color vertical logo on NANP Light Green

# When developing NANP materials, the NANP logo must always appear with the necessary clearance.

The amount of white space around the logo is defined as a minimum of half of the width of the NANP icon away from the closest graphics.

full-color horizontal logo (guides shown for spacing)

## Colors

Color is an integral part of NANP's brand identity. Consistent use of the color palette reinforces the brand's cohesiveness.

NANP's brand colors are NANP Light Green, NANP Dark Green, NANP Gray, and NANP Sidebar Gray.

To achieve consistent color, use the below color systems as follows:

#### CMYK: Use CMYK for most professional and in-house printing.

Uses a combination of four inks: Cyan, Magenta, Yellow, Black.

- Pantone: Use Pantone when professionally printing 1- and 2-color materials, particularly for logo or large color blocks for color consistency throughout materials. Uses specific ink colors.
  - RGB: Use RGB for web, mobile, TV, etc. Uses a combination of Red, Green, and Blue light for onscreen display.
  - Hex: Use Hex for web design and development (HTML, CSS, SVG, etc.). Uses a 6-digit hexadecimal code.

#### **NANP Light Green**

CMYK: 31, 0, 79, 0 PANTONE: 367 C HEX: BAD661 RGB: 186, 214, 96

#### NANP Dark Green

CMYK: 90, 33, 98, 26 PANTONE: 7727 C HEX: 026938 RGB: 2, 105, 56

#### **NANP Gray**

CMYK: 0, 0, 0, 80 PANTONE: COOL GRAY 11 C HEX: 58585B RGB: 88, 89, 91

#### **NANP Sidebar Gray**

CMYK: 0, 0, 0, 10 PANTONE: COOL GRAY 1 C HEX: E9E9E9 RGB: 233, 233, 233

## **Typography Preferred**

The NANP brand consists of three primary fonts: Montserrat Regular, Montserrat Black, and Montserrat Bold, with Montserrat Italic used sparingly.

All can be downloaded from Adobe Fonts (fonts.adobe.com).

#### When using:

- Avoid underlining text (ONLY underline hyperlinks in digital materials)
- Avoid italics unless a further level of typographical hierarchy/distinction is required (in this case, use only the Montserrat Italic weight)

#### Montserrat Regular: Body Copy

abcdefghijklmnopqrstuvwxyz ABCDEFGHIJKLMNOPQRSTUVWXYZ 1234567890

#### **Montserrat Black: Headlines**

abcdefghijklmnopqrstuvwxyz ABCDEFGHIJKLMNOPQRSTUVWXYZ 1234567890

#### Montserrat Bold: Highlighted Copy

abcdefghijklmnopqrstuvwxyz ABCDEFGHIJKLMNOPQRSTUVWXYZ 1234567890

#### Montserrat Italic: Use Sparingly

abcdefghijklmnopqrstuvwxyz ABCDEFGHIJKLMNOPQRSTUVWXYZ 1234567890

## **Typography Alternate**

Although Adobe's Montserrat typeface is always preferred, in rare instances, downloading it may not be feasible.

In this case, use Microsoft's Arial typeface in the following weights.

#### Arial Regular: Body Copy

abcdefghijklmnopqrstuvwxyz ABCDEFGHIJKLMNOPQRSTUVWXYZ 1234567890

#### **Arial Black: Headlines**

abcdefghijklmnopqrstuvwxyz ABCDEFGHIJKLMNOPQRSTUVWXYZ 1234567890

#### Arial Bold: Highlighted Copy

abcdefghijklmnopqrstuvwxyz ABCDEFGHIJKLMNOPQRSTUVWXYZ 1234567890

#### Arial Italic: Use Sparingly

abcdefghijklmnopqrstuvwxyz ABCDEFGHIJKLMNOPQRSTUVWXYZ 1234567890

## NANP's professional materials demonstrate a unified look and feel that creates consistency and tells your story.

Audiences are more likely to connect with the NANP brand when they have a good understanding of what you're about.

		Energy	2nd Law of Thermodynamics If no energy enters or leaves the system, the potential energy of the state will always be less than that of the
			initial state.
NATIONAL	Energy is govern	ned by the first and second laws of	Gross Energy Fecal energy loss
ANIMAL	thermodynamics. Sometimes, it helps to translate		▼ <sup></sup>
UTRITION these laws to animal nutrition.		these laws to animal nutrition.	Digestible Energy Urine and gaseous energy loss

## Icons

Icons can be an effective way to draw attention to a particular topic. They can also create readability in your materials (see Copy section, p. 20).

#### Icons should be:

- Clearly associated with the topics they represent
- Easily recognizable
- Consistent in design and form

Appropriate icon groupings can be found on stock image websites (e.g., Shutterstock, iStock etc.).

## Photography

## Choosing the appropriate photos to pair with design is crucial to conveying NANP's brand.

When selecting photos, stock images may be necessary. In this case, ensure the utmost accuracy in the following:

- Healthy, thriving livestock
- Types of feed used
- Farming techniques/practices
- Geography

Additionally, be mindful of your audiences and possible reactions—when choosing photos. Ensure imagery is relevant to NANP's mission, vision, and values.

## Audio/Video

# Audio/video can be an effective way to communicate information in a clear, accessible way.

Like all NANP brand materials, audio/video should be as high quality as possible to properly represent the organization.

#### When producing audio/video assets:

- Ensure your audio/video is recorded in a quiet area
- Be mindful of distracting background visuals
- When possible, use natural light and shallow depth of field to focus on the subject
- Open and close each video with branded NANP "bumpers"

## Сору

## Clear, effective copy is key to communicating the NANP brand and making a connection to your various audiences.

When marketing and communications materials are overloaded with content, your message is diluted, and audiences become overwhelmed.

For all marketing materials, distill content to accessible, manageable chunks of information.

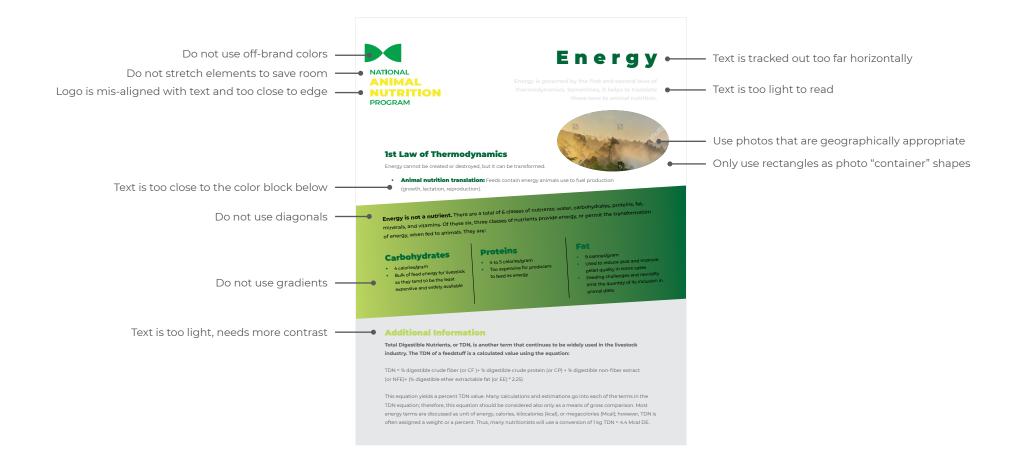

#### This includes:

- Clear visual hierarchy (use of headings, subheadings, icons, body text, bulleted/numbered lists, etc.)
- Short paragraphs separated by white space
- Short lines of text
- Related content grouped together

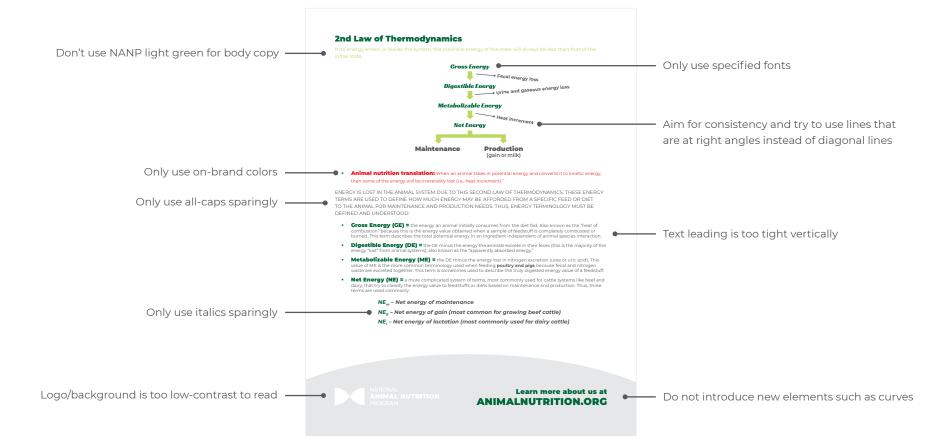

This improves readability and increases recall for your audiences, instilling trust and strengthening their connection to NANP.

## **Incorrect Usage**

# Avoid incorrect use of the NANP brand guidelines, as shown in the following examples.

## **Incorrect Usage**

## **Going Forward**

## These brand guidelines act as a flexible, yet robust, foundation for communicating.

Maintaining consistency—with the logo, colors, typography, icons, photography, audio/video, and copy—is imperative. Veering too far from the guidelines can weaken your overall brand and erode audience trust.

When you adhere strictly to your brand, you'll be easily recognized as belonging to the same group, gaining a single major perception, and increasing NANP's recognition.
