

Natural Resources Conservation Service
U.S. DEPARTMENT OF AGRICULTURE

A WORKSHOP TO BECOME

QUALIFIED AND CERTIFIED

IN FEED MANAGEMENT

AN ON-LINE VIRTUAL TRAINING

SEPTEMBER 12, 2024

10:30 AM – 5:00 PM ET

OPPORTUNITIES FOR BOTH YOU AND YOUR CLIENTS

As a Natural Resources Conservation Service (NRCS) conservation professional or someone with an interest, this training will help you become knowledgeable in aspects of feed management and learn more about the NRCS Conservation Practice Standard, Feed Management (Code 592).

As a potential Technical Service Provider (TSP) this training will help you leverage resources, allow you to better help clients, and expand your network for conservation projects.

This one-day workshop, hosted by the National Animal Nutrition Program (NANP) and the USDA's NRCS, will provide participants with a general understanding of feed management and an overview of all required items to meet TSP certification criteria, including demonstrations of NRCS Registry and Aglearn training websites. For more information, please review the NRCS TSP Website. [Technical Service Providers | Natural Resources Conservation Service \(usda.gov\)](#). Make sure to create Your USDA Verified Login.gov Account prior to attending so we can help you navigate these steps towards your TSP Certification. https://secure.login.gov/sign_up/enter_email

Contact Dan Ludwig at the email address below to register and receive an invitation to join the training.
